Leased Access Report

Company: Viacom Cablevision of San Francisco
2055 Folsom St.
San Francisco, CA 94110

Number of Subscribers: 161000

Basic Cable rate: \$17.00

Half hr rate imp: \$41.32

of basic channels: 46

Half hr rate quotes: \$50

Paragraph 518 footnote 1312

In this case the cable operator carries a public broadcasting station on its basic tier, it pays nothing for the programming. This cable operator has 46 basic channels and the monthly rate is \$17.00 , then the subscriber fee to view this channel is \$.37.

$$[(.37 - \$0.00) \times 1.00] = .37$$

Furthermore maximum rates for shorter periods can be calculated by prorating the monthly rate.

The monthly channel rate of \$.37 is divided by 30 days to get a daily rate of \$.01. The hourly rate can be obtain by dividing the daily rate by 24 which is \$.0005 per subscriber. This number is then multiplied by the number of subscribers and divided by 2 to get an implicit rate of \$41.32 per half hour.

This cable operator's half hour rate quote is \$50.00 which is 121% of the federally regulated rate.
